

The bicycles are suitable to fit aircraft warning spheres on single lines and to fit spacers on two, three and four bundled conductor lines. By pedalling forward the bicycle moves backward in order to provide the operator with necessary working space.

The bicycles are equipped with a disc brake on the driving wheel and with an additional safety clamp, which brakes directly on the conductor.

A meter counter and safety chains are also provided.

For models BIB 011 and BIQ 030 the distance between conductors can be set from 350 mm up to 600 mm with pitch of 50 mm. Special models with different characteristics can be designed according to customer's needs

Note: specify the distance between the conductors on the order

Mod. BIS 002

In alloy-light for single lines

Mass 19 kg

OPTIONAL

BDC 002 Basket for working devices

Mod. BIB 011

In alloy-light for two bundled conductor lines

Mass 34 kg

OPTIONAL

BDC 003 Basket for working devices

Mod. BIT 020 (l=400 mm)
Mod. BIT 021 (l=450 mm)

For three bundled conductor lines
(l = Conductor distance)

Mass 55 kg

OPTIONAL

BDC 004 Basket for working devices

Mod. BIQ 030

For four bundled conductor lines

Mass 64 kg

OPTIONAL

BDC 005 Basket for working devices
